## 3 Composition and Information on Ingredients

· Chemical characterisation: Mixtures

• Description: Mixture of substances listed below with nonhazardous additions.

| 64-17-5   | Ethyl Alcohol  | ≥30-≤60%  |
|-----------|--|-----------|
|           | Flammable liquids – Category 2, H225; ( Eye damage/irritation – Category 2A, H319  |           |
| 868-77-9  | 2-Hydroxyethyl Methacrylate  | 10-<30%   |
|           | <ul> <li>Skin corrosion/irritation – Category 2, H315; Eye damage/irritation – Category 2A, H319; Skin sensitisation – Category 1, H317</li> </ul> |           |
|           | Trade Secret   | ≥5-<10%   |
|           | $\Leftrightarrow$ Skin corrosion/irritation – Category 1A, H314; Eye damage/irritation – Category 1, H318  |           |
|           | Trade Secret   | ≥5-<10%   |
|           | 😔 Skin corrosion/irritation – Category 1A, H314  |           |
| 0287-53-3 | Ethyl-4-Dimethylamino Benzoate   | ≥0.3-<10% |
|           | 🚸 Reproductive toxicity – Category 1B, H360  |           |
|           | Irgacure 819   | ≥0.1-<1%  |
|           | 😯 Skin sensitisation – Category 1, H317  |           |

Date of issue: 28.02.2025

Revision: 28.02.2025

Trade name: Peak<sup>TM</sup> SE Primer (Part 1 of 2)

· Additional information: For the wording of the listed hazard phrases refer to section 16.

#### (Contd. of page 2)

### **4 First Aid Measures**

- · General information: Immediately remove any clothing soiled by the product.
- After inhalation:
- Seek medical treatment in case of complaints.
- Supply fresh air and to be sure call for a doctor.
- In case of unconsciousness place patient stably in side position for transportation.
- After skin contact:
- If skin irritation continues, consult a doctor.
- Immediately wash with water and soap and rinse thoroughly.
- After eye contact: Rinse opened eye for several minutes under running water. Then consult a doctor.
- After swallowing:
- Do NOT induce vomiting.
- Rinse mouth with water.
- Drink plenty of water and provide fresh air. Call for a doctor immediately.
- Information for doctor:
- *Most important symptoms and effects, both acute and delayed* No further relevant information available.
- · Indication of any immediate medical attention and special treatment needed
- No further relevant information available.

### **5** Fire Fighting Measures

- Suitable extinguishing agents:
- Carbon dioxide Dry Chemical Foam
- Special hazards arising from the substance or mixture
- During heating or in case of fire poisonous gases are produced.
- Advice for firefighters:

General: Evacuate all personnel; use protective equipment for fire-fighting. Use self-contained breathing apparatus when the product is involved in fire.

- Protective equipment:
- *Wear fully protective suit. Mouth respiratory protective device.*

### 6 Accidental Release Measures

| · Personal precautions, protective equipment and emergency procedures                            |                    |
|--|--------------------|
| Mount respiratory protective device.   |                    |
| Wear protective equipment. Keep unprotected persons away.  |                    |
| · Environmental precautions:   |                    |
| Dilute with plenty of water.   |                    |
| Do not allow to enter sewers/ surface or ground water.   |                    |
| • Methods and material for containment and cleaning up:  |                    |
| Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust). |                    |
| Use neutralising agent.  |                    |
| Dispose contaminated material as waste according to section 13.                                  |                    |
| Ensure adequate ventilation.   |                    |
| -  | (Contd. on page 4) |

Date of issue: 28.02.2025

Revision: 28.02.2025

(Contd. of page 3)

### Trade name: Peak<sup>TM</sup> SE Primer (Part 1 of 2)

· Reference to other sections

See Section 7 for information on safe handling. See Section 8 for information on personal protection equipment. See Section 13 for disposal information.

### 7 Handling and Storage

· Handling:

- **Precautions for safe handling:** Ensure good ventilation/exhaustion at the workplace.
- *Open and handle receptacle with care. Prevent formation of aerosols.*
- Information about fire and explosion protection: Keep ignition sources away - Do not smoke. Protect against electrostatic charges.

*Keep respiratory protective device available.* 

· Storage:

• Requirements to be met by storerooms and receptacles: No special requirements.

- · Information about storage in one common storage facility: Not required.
- Further information about storage conditions: Keep container tightly sealed.
- Specific end use(s) No further relevant information available.

### 8 Exposure controls and personal protection

· Appropriate engineering controls No further data; see section 7.

· Ingredients with limit values that require monitoring at the workplace:

64-17-5 Ethyl Alcohol

WES Long-term value: 1880 mg/m<sup>3</sup>, 1000 ppm

· Additional information: The lists valid during the making were used as basis.

· Personal protective equipment:

General protective and hygienic measures:

Keep away from foodstuffs, beverages and feed.

Immediately remove all soiled and contaminated clothing.

Wash hands before breaks and at the end of work.

Store protective clothing separately.

Avoid contact with the eyes.

Avoid contact with the eyes and skin.

· Respiratory protection:

In case of brief exposure or low pollution use respiratory filter device. In case of intensive or longer exposure use self-contained respiratory protective device.

· Protection of hands:

Protective gloves

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture.

Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation (Contd. on page 5)

- AU

Date of issue: 28.02.2025

Revision: 28.02.2025

(Contd. of page 4)

## Trade name: Peak<sup>TM</sup> SE Primer (Part 1 of 2)

#### · Material of gloves

The selection of suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

### · Penetration time of glove material

The exact breakthrough time has to be found out by the manufacturer of the protective gloves and has to be observed.

### • Eye protection:

Tightly sealed goggles

· Body protection: Protective work clothing

| General Information                      |   |
|--|---|
| Appearance:                              |   |
| Form:                                    | Liquid  |
| Colour:                                  | Yellow  |
| Odour:                                   | Methacrylate  |
| Odour threshold:                         | Not determined.   |
| pH-value at 20 °C:                       | 0.9-1.5   |
| Change in condition                      |   |
| Melting point/freezing point:            | Undetermined.   |
| Initial boiling point and boiling range: | Undetermined.   |
| Flash point:                             | <27 °C  |
| Flammability                             | Flammable.  |
| Decomposition temperature:               | Not determined.   |
| Ignition temperature:                    | Product is not selfigniting.  |
| Explosive properties:                    | Product is not explosive. However, formation of explosive air/vapor |
|  | mixtures are possible.  |
| Explosion limits:                        | -   |
| Lower:                                   | Not determined.   |

### 10 Stability and Reactivity

• *Reactivity Polymerization occurs when exposed to visible light, ultraviolet light or extreme heat.* 

- · Thermal decomposition / conditions to be avoided: Stable under recommended storage conditions
- · Possibility of hazardous reactions: No dangerous reactions known.

· Conditions to avoid:

Direct Light

Heat

Flames Void

v oiu

Not applicable

- *Incompatible materials:* No further relevant information available.
- · Hazardous decomposition products: No dangerous decomposition products known.

#### 11 Toxicological Information

· Information on toxicological effects

• Acute toxicity Based on available data, the classification criteria are not met.

|              | LD/LC50 values relevant for classification: |                                      |  |
|--------------|---|--------------------------------------|--|
| 64-17-5 E    | 64-17-5 Ethyl Alcohol                       |                                      |  |

· Primary irritant effect:

· Skin corrosion/irritation Causes severe skin burns and eye damage.

· Serious eye damage/irritation Causes serious eye damage.

• **Respiratory or skin sensitisation** May cause an allergic skin reaction.

• Germ cell mutagenicity Based on available data, the classification criteria are not met.

· Carcinogenicity Based on available data, the classification criteria are not met.

· Reproductive toxicity May damage fertility or the unborn child.

• STOT-single exposure Based on available data, the classification criteria are not met.

• STOT-repeated exposure Based on available data, the classification criteria are not met.

• Aspiration hazard Based on available data, the classification criteria are not met.

· Seveso category P5c FLAMMABLE LIQUIDS

- Qualifying quantity (tonnes) for the application of lower-tier requirements 5,000 t
- Qualifying quantity (tonnes) for the application of upper-tier requirements 50,000 t

• Chemical safety assessment:

Device is biocompatible when used as directed by dental professionals per ISO 10993-1

### 16 Other information

This information is based on our present knowledge. However, this shall not constitute a guarantee for any specific product features and shall not establish a legally valid contractual relationship.

• Relevant phrases from Section 3

H225 Highly flammable liquid and vapour.

- H314 Causes severe skin burns and eye damage.
- H315 Causes skin irritation.
- H317 May cause an allergic skin reaction.
- H318 Causes serious eye damage.
- H319 Causes serious eye irritation.

(Contd. on page 10)
